SYSTEMS INTEGRATION

DATABASE

MOBILE

SaaS

Microsoft

CODE

We are experts on integrating Microsoft Systems such as Active Directory and Directory Services on **Windows Server 2016/2019, Exchange Servers 2016/2019, SharePoint Portal** and **System Center.**

Windows Server 2019 is the operating system that bridges on-premises environments with Azure, adding additional layers of security while helping you modernize your applications and infrastructure.

SOFTWARE DEVELOPMENT

We build the software your business runs on. When software is business-critical, you need a partner who can solve complex problems, engineer for scale, and keep evolving as you do.

From initial planning to deployment, our comprehensive approach ensures that each phase of the software development process is covered, including requirements analysis, design, programming, testing, and maintenance.

Predictable delivery:- With effective project management, you get exactly what you've requested within time and budget.

Industries we cover:- Education, Corporate Business, Financial Institutions, Marketing, Pharmacetical, NGO etc.

- Custom Software Development
- Mobile Application Development
- Payment Gateway Integration

NETWORK INFRASTRUCTURE

Brax Telecomms designs and implements complete network infrastructure for data center, enterprise and small-to-medium business entities. Our solutions leverage industry-proven Ethernet and fiber technology to promote faster and more cost-efficient transport and processing of voice, video and data across both wired and wireless networks. We offer network infrastructure that is scalable, secure and easy to manage.

Our products are found in a wide variety of networking equipment and accessories:

- UTP Cable
- Cat6 UTP Patch Cords
- Wireless Device

- Fiber Cables
- Fiber Converters
- Fiber Patch Cords

Harnessing the power of advanced AI technology, the Single Camera Tracking solution for the Avonic CM93 takes your tracking experience to new heights. No more manual adjustments. Once the additional tracking feature (AV-LC90-1) is enabled on our CM93 camera, it effortlessly and autonomously tracks your presenter's every move with unparalleled precision. Every intricate detail is captured seamlessly, providing you with the utmost convenience and accuracy during lectures, video recordings, or engaging with your audience.

With its unparalleled performance, future-proof technology, top-notch security, flexibility, and cost-effectiveness, DICENTIS stands out as the ultimate choice for your conferencing needs. Experience seamless, latency-free audio across 100 languages, supported by standardized IP technology and robust encryption

OUR APPROACH

Quality Assurance

- Business and technology specialists sit in an open plan environment to encourage close interaction.

- Development cycle is incremental and based on rapid and agile methodologies

Expertise

- Project managers and other technical staffs are all strong technology specialists with business knowledge.

- All sign-off and approvals on business functionality remains the sole prerogative of business specialists

Delivery

- Our projects have a maximum timeline of months depending on project nature. Shorter cycles are customers privileges.

- Each phase delivers real business functionality and business benefit.
